

EMPOWERING PATIENTS

PROMETHEUS (PROject for a Medically Educated, Transformed, HHealthy, and United Society) is a EU-funded Interreg 5a project whose primary goal is to educate, activate, and empower patients.

In greek mythology Prometheus was the wisest of all titans. He stole fire from the gods and gave it to man. With it came knowledge, understanding, and enlightenment. Just like the titan, the PROMETHEUS project is to bring knowledge and enlightenment. This time expert medical knowledge will be brought to ordinary people, helping them understand and take on an active part in their own health, helping them become Empowered Patients.
